BLANCO
GERMANY

As individual as you are!

Modern kitchens for convenience.

Perfect solutions offered by BLANCO.

You should never compromise when buying a sink centre. What counts above all else is **quality** – in every respect. As well as the **perfect processing of top-quality materials**, this also includes contemporary **design down to the tiniest detail** and **perfectly matching accessories**.

BLANCO is one of the leading suppliers of sink centres and, with **more than 90 years of experience**, avails of extensive expertise in order to keep developing **innovative solutions** for its customers.

BLANCO's particular strengths are system concepts that make optimum use of available space, make work easier and continue to look good even after many years.

Discover how your requirements can be easily satisfied on the following pages.

BLANCO – turns a sink into a sink centre.

Quality and comfort
for the heart of the kitchen.

6 tips for making the right choice

Optimum space utilisation for ease of use. There is a BLANCO solution for any size of sink cabinet. A cabinet width of 60 cm is ideal for sinks with a main and additional bowl. Countless designs, e.g. for corners or narrow sink cabinets and cabinets in front of a window offer plenty of alternatives for maximising the available space.

Ergonomics and functionality make life easier. Make light work of washing up with a BLANCO sink. Main and additional bowls and accessories are designed to facilitate smooth working.

Cleaning made easy. Special materials and strong, user-friendly BLANCO surfaces minimise the effort required for cleaning our sink centres: dirt and water find it hard to remain on the surface; signs of use are soon eliminated. Common household cleaning products make easy work of keeping your sink looking beautiful.

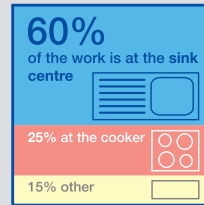

A corner solution for perfect utilisation of the available space.

The cutting board and multifunctional colander can easily be moved.

SILGRANIT® PuraDur®: outstanding ease of care.

Did you realise that 60% of time in the kitchen is spent at the sink?

Thus the kitchen sink is the most important workplace in the kitchen. To ensure that food preparation, washing and cutting and other important tasks

are as efficient as possible our multidisciplinary teams constantly work on the perfect balance of function and aesthetics. Our kitchen sinks incorporate the benefits of sensible space utilisations, ergonomic design and ease of cleaning. It is our priority to ensure that kitchen sink design, colour and style suits your overall kitchen look.

Convenience in a system. The perfect synergy between the individual elements is what turns a sink into a functional sink centre. This is achieved with the right mixer taps and waste systems and the matching accessories. It is the perfect coordination between mixer tap and sink that provides the maximum in aesthetics and functionality in the kitchen.

Add style with material and colour. Whether tone in tone or with coloured highlights in the same material or a tasteful mix, BLANCO always offers plenty of room for inspiration. A choice of materials such as Stainless Steel, SILGRANIT® composite material or high quality ceramic and a wide range of attractive colours offer almost unlimited choice.

The right installation method for every requirement. BLANCO provides an installation method to suit every kitchen design. Undermount bowl and flushmount installation guarantee a flawless look. With handcrafted bowls and sinks, coordinated system solutions for everything associated with the work surface, and customised designs, you can achieve something extraordinary for a striking overall appearance.

Even the waste separation is perfectly organised – thanks to BLANCO SELECT.

Perfect synergy: sink and mixer tap.

Award winning mixer taps from BLANCO.

Materials and finish to suit your lifestyle

You have your own unique vision of what makes the perfect kitchen. How you use your sink is important when deciding which material is right for your kitchen because each precision-engineered material has individual characteristics and benefits. Our range covers everything from the latest contemporary trends to classic lines, so all you have to do is choose the one that best complements your cooking style and personality.

Stainless Steel

Stainless Steel differs from most materials in that it can be integrated into almost any kitchen environment. Its most important properties:

- Timeless classic aesthetics
- Does not rust
- Completely heat resistant
- Hygienic and suitable for food preparation
- Stain and acid resistant
- Easy to care for

BLANCO uses only the highest quality 18/10 Stainless Steel to meet the most exacting requirements.

BLANCO Ceramic

Sinks made of BLANCO Ceramic create a special homely atmosphere.

Their attractive appearance and glazed surface finish blend with both traditional and modern kitchens.

Modern production methods and special manufacturing techniques together with the skills of our craftspeople ensures that our quality remains constant. Care throughout the production process helps to produce a sink which will maintain its appearance for years to come. Its most important properties:

- Easy to care for
- Stain and acid resistant
- Colour safe
- Completely heat resistant
- Hygienic and suitable for food preparation

SILGRANIT® PuraDur®

SILGRANIT® PuraDur® is a unique 'easy care' sink material which has been patented and developed exclusively by BLANCO.

- Hygiene+Plus is a shield against dirt and bacteria
- Easier cleaning, thanks to the unique patented hygiene protection formula
- SILGRANIT® PuraDur® is antibacterial. Tests confirm that the unique built-in hygiene protection reduces bacterial growth by an average of 98%
- Superior durability and a smooth silk surface with the look and feel of natural stone
- Available in attractive colours all with a uniform surface finish

SILGRANIT® PuraDur® with the patented hygiene protection formula

Sinks and Taps Explained

Sinks

Sink Profiles

BLANCO sinks come with a range of different profiles.

Standard: Edge is rolled over to meet the worktop.

Module: Module placed on top of worktop.

Module: In-between module.

IF and IF/A: Unique 1mm flat edge profile.

Undermount: Undermount installation.

Sink waste

Features

InFino® with Remote Control

InFino® Manual

Taps

Features

Aerator: Mixes air into the flow of water to give a champagne-like flow. Some taps are fitted with a flow straightener; however, some of our taps are fitted with an aerator which are highlighted by this icon.

Pull-Out Spray: Features a pull-out spray, useful for directional rinsing.

Spray rinse: Pull out rinse feature.

Dual flow: Both hot and cold supply are kept completely separate through the tap, mixing only in the flow from the spout.

High pressure only

Recommended **solid work surface worktop or SILGRANIT® sink**: Alternatively with the use of a tap stabilising bracket, code: BL450775 or BL467720.

Chrome finish

Brushed steel

Stainless Steel

Colour options

6 Litre: 6 Litre/min water saving variant available.

Important note: The BLANCO tap range includes a wide range of possibilities which are suitable for most plumbing systems. However not all taps are suitable for every possible system. For example, a high pressure tap might not satisfactorily function on a low pressure gravity system. If a tap proves to be inappropriate for the supply provided, rectifying the situation may indeed prove a costly experience so it is vital if you are in doubt as to the compatibility of a chosen tap for your particular type of system, you seek professional advice from your supplier, either the dealer or the plumber, to ensure that there are no disappointments and problems.

BLANCO InFino®.

Perfectly integrated waste system.

Extremely easy to clean thanks to the almost flush integration with no rims or edges.

Perfect ease of care. InFino® can be dismantled into only two components for easy cleaning: the plug in the outlet and the strainer.

Unique control. The waste is always central and always remains flush whether opened or closed.

InFino® is the innovative outflow concept for all BLANCO sink materials the stylish and contemporary design offers a streamlined look. The impressive functional aspect and ease of control of the InFino® waste sets a new standard.

The superior waste system:

- Elegant puristic design
- Almost transition-free integration
- Flushmount design
- Unique intuitive control concept; optionally with remote control
- Service-friendly construction thanks to fast and simple valve installation

Intuitive control concept. In the manual version, the outflow is opened and closed by turning the InFino® waste to the right or left. In contrast to other up-and-down waste options, this does not change the position of the strainer and the perfect looks of the sink centre are always maintained due to it staying flush with the base of the sink.

Sinks with the new InFino® strainer system are shown with the following icons to suite the type of drain system.

InFino® with remote control.

InFino® manual.

New BLANCO InFino® waste system

BLANCO InFino® and SILGRANIT® PuraDur® - unique flush feel.

Optionally with pop-up remote control. The remote controlled version may be fitted at any time.

BLANCO InFino® and Ceramic - expression of exclusivity.

This functional step concept by BLANCO turns a bowl into a complete sink unit. Thanks to the integrated step, the bowl can be used on 3 levels in parallel: in the bowl itself, on the bowl step and on the edge of the bowl with clever accessories.

Furthermore, BLANCO ETAGON combines this functionality with a great design. The elegant radii and high quality features of the bowls with the concealed C-overflow® and the new, innovative InFino® drain system will enhance any modern kitchen design.

What is particularly special, though, is the synergy between the bowl design and the ETAGON rails. Made of high quality Stainless Steel, they complete the interim level and sit securely on the step. The options for using the ETAGON rails together with standard household items or matching BLANCO accessories are as varied as the requirements of the users.

Modern comeback of the Belfast-style sink.

BLANCO CRONOS XL 8.

NEW

Bowl: BLANCO CRONOS XL 8-IF, Stainless Steel

Mixer tap: BLANCOCULINA-S Duo, Stainless Steel

The BLANCO CRONOS features a modern apron front design.

The Belfast-style sink is fitted with a large, hand-made BLANCO CLARON XL single bowl with a InFino® drain system.

BLANCO
STEELART

BLANCO CRONOS from the **STEELART** collection is a new testimony to the art of perfect **Stainless Steel workmanship**. BLANCO CRONOS is a modern interpretation of the traditional Belfast-style sink, manufactured from high-quality Stainless Steel. Its pared-down design and clear lines bear the familiar signature of the STEELART production facility. Notable above all is the eye-catching front apron in brushed Stainless Steel, the matt finish of which goes perfectly with the trims of the electric appliances.

With its characteristic Belfast-style sink design, BLANCO CRONOS blends happily with urban lifestyle kitchens in traditional forms where the desire is for a specific style mix of country-house elements with a modern interior.

Collection system. BLANCO COLLECTIS 6 S.

NEW

Sink: BLANCO COLLECTIS 6 S, SILGRANIT® PuraDur®, White
Tap: BLANCO FELISA-S, SILGRANIT®, White/Chrome (not included in range)

The sorting bin and cover provide temporary storage for organic waste.

Flowing work sequences with the chopping board and sorting bin.

The sorting bin makes a perfect couple with BLANCO SELECT.

BLANCO brings a brand new meaning to the concept of efficient meal preparation with the BLANCO COLLECTIS 6 S in SILGRANIT® PuraDur®.

This modern, generously designed functional sink with the elegant, filigree edge and clear lines delights on every level, not just optically.

The central sorting bowl with the specially developed sorting bin offers entirely new possibilities for dealing with organic waste in the kitchen. When processing fruit, vegetables and salads, the cuttings can be moved from the exclusive, solid maple chopping board directly into the sorting bin in just a single movement. A practical lid is also available to go over the bin.

The COLLECTIS system becomes uniquely practical in the interplay with BLANCO SELECT. The sorting bin with lid can be hung into the 15 or 30-l bins of either waste system, or in the organiser drawer of the BLANCO SELECT Orga waste system. This innovation provides a hygienic, practically invisible temporary storage solution for organic waste, before disposal in the organic waste bin or on the compost heap.

The BLANCO COLLECTIS 6 S sink provides the added benefits of a spacious main bowl, as separate pouring spout, the high-quality InFino® drain system including remote control pop-ups, and the concealed C-overflow®.

BLANCO IDENTO 45 S.

BLANCO IDENTO XL 6 S.

Sink: BLANCO IDENTO 45 S, Ceramic PuraPlus®, Magnolia
Tap: BLANCO LINUS-S, Ceramic, Magnolia

BLANCO IDENTO 6 S.

Purist design at its best. The BLANCO IDENTO series with sweeping lines and understated style. It appeals with clear defined functional areas and generous sinks. The natural ceramic material highlights the dynamic styling. The exceptionally flat edge forms a smooth transition to the worktop. There are three bowl versions available to suit individual requirements.

BLANCO IDENTO 45 S has a particularly large draining surface and a large work space. The BLANCO IDENTO XL 6 S with its XL basin offers extra convenience when working with large saucepans and vases. BLANCO IDENTO 6 S with a spacious main and practical additional bowl. A stunning overall appearance with sleek lines made with elegant ceramic materials.

The kitchen tap as the focal point.

The sink and mixer taps are perfectly matched to each other in style and colour.

When it comes to buying a kitchen tap, you should never compromise.

What counts above all else is quality – in every facet.

For 90 years now, BLANCO has been at home in the kitchen, developing versatile sinks, mixer taps, and waste systems.

Perfected solutions for added value in every kitchen: because that extra comfort and longer value retention bring more joy to daily life in the kitchen.

PROFESSIONAL

Oriented towards professional demands

This is the place for those seeking a mixer tap that offers the highest functionality and flexibility.

BLANCO LINEE-S

INDIVIDUAL

Individual design

Award-winning designs, frequently combined with innovative handling concepts, offer the freedom for individual preferences.

CONTEMPORARY

Modern solutions for any taste

The contemporary range appeals with its tremendous variety.

CLASSIC

Classic models, popular and proven

Whether linear or stylishly rounded, these popular designs will blend perfectly with any kitchen.

Sensor technology redefined.

BLANCO SOLENTA-S Senso with touchless start/stop interface.

NEW

Mixer tap: BLANCO SOLENTA-S Senso, stainless finish UltraResist

The sensor technology with start-stop interface enables the activation of water without touching the tap.

The sensor detection field is set to a precise 6cm range. It prevents unintended activations and makes SOLENTA-S Senso unique in its class.

SOLENTA-S also has an exclusive dual-jet spray with integrated change-over function.

Ideal kitchen aids.

BLANCO accessories make things easier for you and your kitchen more attractive.

Multifunctional basket made of Stainless Steel for versatile use.

Lay-on **drainer tray** made of quality plastic, particularly useful for single-bowl sinks.

Innovative ash compound **bridging chopping board**.

High-quality **glass chopping board** made of white safety glass.

Floating Grid – creates a work-level in the sink and can also be used as a countertop trivet.

Often it's the little things in life which make a difference. For example, **fitting** a sink with **accessories** can make it even more **convenient** while also making it more attractive – in the form of a drain cover or sensor-controlled remote control.

When preparing food, you can **save yourself unnecessary actions** and additional utensils by using multi-functional accessories.

Innovative concepts and high-quality materials transform BLANCO sink centres into modern kitchen workspaces without making any compromises.

More information about our accessories is available at www.blanco.co.uk

BLANCO TANGO soap dispenser can be positioned next to your kitchen tap.

The design drain remote control **BLANCO LIVIA** is an eye-catching feature in any kitchen.

Comfort knob made of Stainless Steel to operate the drain remotely.

Pop-up remote control element: available in several designs, materials and surfaces.

Hob: BLANCO Hi-Light Ceramic Hob 6000W

BLANCO hobs are designed and built with the well-established BLANCO quality in mind.

With contemporary designs and high quality materials our hobs add style and performance to any kitchen. Minimum joins and seams ensure there are fewer areas for grease to build up, making the hob easier to clean and ultimately more hygienic. All BLANCO hobs boast innovative features to make cooking safer and more enjoyable and they are rigorously tested to withstand many years of use, even in the busiest kitchens.

The induction hob provides the most efficient method of cooking, because with induction cooking a magnetic field instantly transforms your pan into the heat source.

Induction hobs are extremely energy efficient as they only heat up the base of the pan and its contents, saving you money on your electricity bills.

Benefits you'll love

- Dishwasher safe and size compatible
- High quality food grade enamel
- Optimised for heating and repartition efficiency

Extractor Hoods

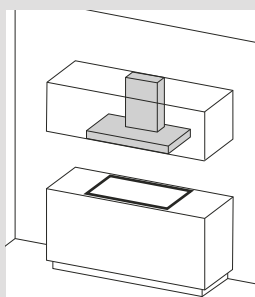

BW1141

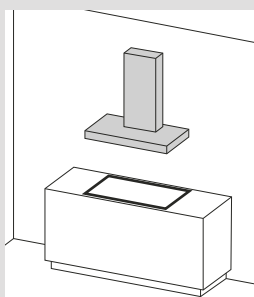

Wall Mounted: BW1141C90

Cooker Hood Types. So what type of cooker hood would you like to have? There are several different cooker hood types and on the market are a huge amount of models to choose from. Your choice depends on your taste and budget and also what is practical in your kitchen. Some of

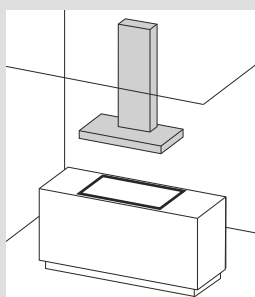

the options are: **Wall Mounted hoods, Built-In hoods, Island hoods, Integrated Ceiling hoods and Integrated Downdraft extractors.**

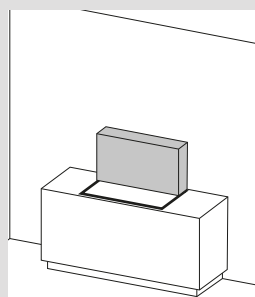

Built-in

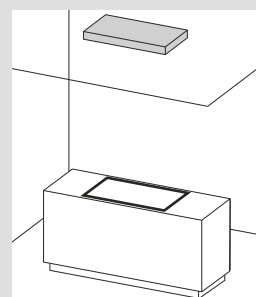

Wall mounted

Island and Pendant

Downdraft

Ceiling

Wall Mounted

This kind of cooker hood is often called a chimney hood, and as the name suggests the top section looks like a chimney. This category includes the modern vertical types that take up less space.

Built-In

Telescopic, Canopy and Integrated hoods are positioned in the kitchen cupboard located on the wall over the cooking area, therefore they won't interrupt the style of the kitchen.

Island & Pendant

Island and Pendant hoods come in a variety of colours, shapes and sizes. They are attached to the ceiling and installed above a kitchen Island. They can be used as a focal point in your kitchen.

Downdraft

Downdraft hoods draw the air across or downwards from the cooking area, so there is no need for an extractor unit positioned in the ceiling above. The top closes or hood retracts back down when not in use.

Ceiling

Ceiling hoods are positioned above the cooking area so they do not obscure the visual impact of the room. They provide extraction for the whole room and not just the local area of the hob.

Built-In Hoods

BW1196

Telescopic Hoods

There are a few different types of Built-In extractor; Telescopic, Integrated and Canopy hoods. The Telescopic hoods disappear underneath the cabinet when not in use, however can extend outwards when operating to increase the catchment area.

BW1196C60/C90

- Telescopic hood
- Front panel black glass
- 2 x 1.5W LED lights
- Outlet dia. 150mm
- Aluminium filters
- 3 speeds
- Air movement 740 m³/h

- Telescopic hood
- Neutral finish
- 2 x 2.5W LED lighting
- Outlet dia. 123mm
- Aluminium filter
- 3 speeds
- Air movement 215 m³/h

Integrated & Canopy hoods

Integrated hoods subtly fit behind a cabinet door therefore won't interrupt the current style of kitchen. Canopy hoods are designed to fit into the kitchen cabinet, so they don't impact on any design schemes.

BW1121

- Integrated hood
- Neutral finish
- 1 x 28W lamp
- Top 120mm outlet
- Aluminium filters
- 3 speeds
- Slider control with auto shut off
- Air movement 200 m³/h

- 2 x 2.5W LED lighting
- Recirculating
- Aluminium filter
- Carbon filter included
- 4 speeds
- Soft touch controls
- Air movement 475 m³/h

BW2530 **NEW**

COLOURS: Pewter (PT), Matt Black (MB), White (WH), Rust (RU), Copper (CO)

- Pendant Island hood
- Aluminium painted finish
- 15W LED lighting
- Recirculating
- Aluminium filter
- Carbon filter included
- 4 speeds
- Remote control included
- Air movement 350 m³/h

Downdraft Hoods

BW2100

Downdraft Hoods

An integrated worktop cooker hood is invisible when not in use as it is hidden in the worktop. It can be situated either behind or next to your hobs. For the BW2100 When you begin to cook you will press a button for the extractor to rise out of the worktop and after cooking the extractor will then sink back within the work top so it is invisible.

BW2100 **NEW**

- Retractable downdraft hood
- Stainless Steel / black glass
- LED lighting
- Outlet dia. 150mm
- Aluminium filter
- Carbon filter included
- 4 speeds
- Touch control
- Air movement 750 m³/h

BW2120 **NEW**

- Surface downdraft hood
- Stainless Steel
- Ducting and motor supplied
- Outlet dia. 150mm
- Aluminium filter
- 4 speeds
- Touch control
- Air movement 585 m³/h

2 x BW2120 with a standard hob

1 x BW2120 with 2 x Domino hobs

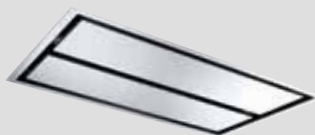

Ceiling Hoods

BW2200

Ceiling Hoods

This type of cooker hood is barely visible, it is either integrated into the ceiling (BW2200) if you want to duct out of the property, or surface mounted (BW2210) if you want to recirculate.

BW2200 **NEW**

- Ceiling hood
- Stainless Steel frame
- Glass panels
- 6 x 3W LED lighting
- Outlet dia. 150mm
- Remote control included
- Aluminium filter
- 3 speeds
- Air movement 765 m³/h

BW2210 **NEW**

- Ceiling hood
- Stainless Steel frame
- Stainless panels
- No ducting required
- LED lighting
- Remote control included

- 30mm location flanges top & bottom
- Heat proof easy clean surface

Stainless Steel

BLANCO lighting.

The perfect solution for every kitchen.

The kitchen is the heart of every home, and it is not uncommon for the modern kitchen to be a multi function room. It's obviously a place to cook and eat, but also to study, work, read and watch television. Choosing the right type of lighting needs to be considered at an early stage. The electrics have to be installed at the start of the project, before the plastering, decorating and fitting has taken place.

Good kitchen lighting can make a modest kitchen appear impressive, whilst a larger contemporary kitchen looks stunning with your eye drawn to expensive features through effective lighting. The key to a successful kitchen lighting scheme is to layer the different types of lighting according to use.

Task lighting
e.g. Under cabinet lighting

Feature lighting
e.g. Plinth lighting

Finishing touches
e.g. Remote dimming lighting

Every kitchen, big or small, needs efficient task lighting. You will need this to ensure that food preparation and cooking takes place safely without shadows.

BLANCO offer an extensive range in surface fitted or recessed LED lights utilising the latest generation of technology. The 'COB' (Chip On Board) LED lights give a uniform light with a wide beam angle and higher light levels. The 'High Definition' range offers conventional LED'S matched with an optical lens to maximise light output.

All of the kits offered by BLANCO come complete with a matched power supply and full instructions. All of the LED lights offer high light outputs with long life, cool running and minimal running costs. Most are available in Warm, Cool or Neutral White. Warm White LED'S give a soft orange/yellow light which mirrors a traditional tungsten or halogen light source. Cool White is colder and is particularly suitable to a modern high gloss design of kitchen. If you require something inbetween, Neutral White would be the perfect alternative.

Care must be given to the colour temperature of lights so they all match, for example the main ceiling lights, pendants or extractor hoods. The illustration shows the different effects of Warm, Cool & Neutral White on a wall.

Create an efficient working space with light.

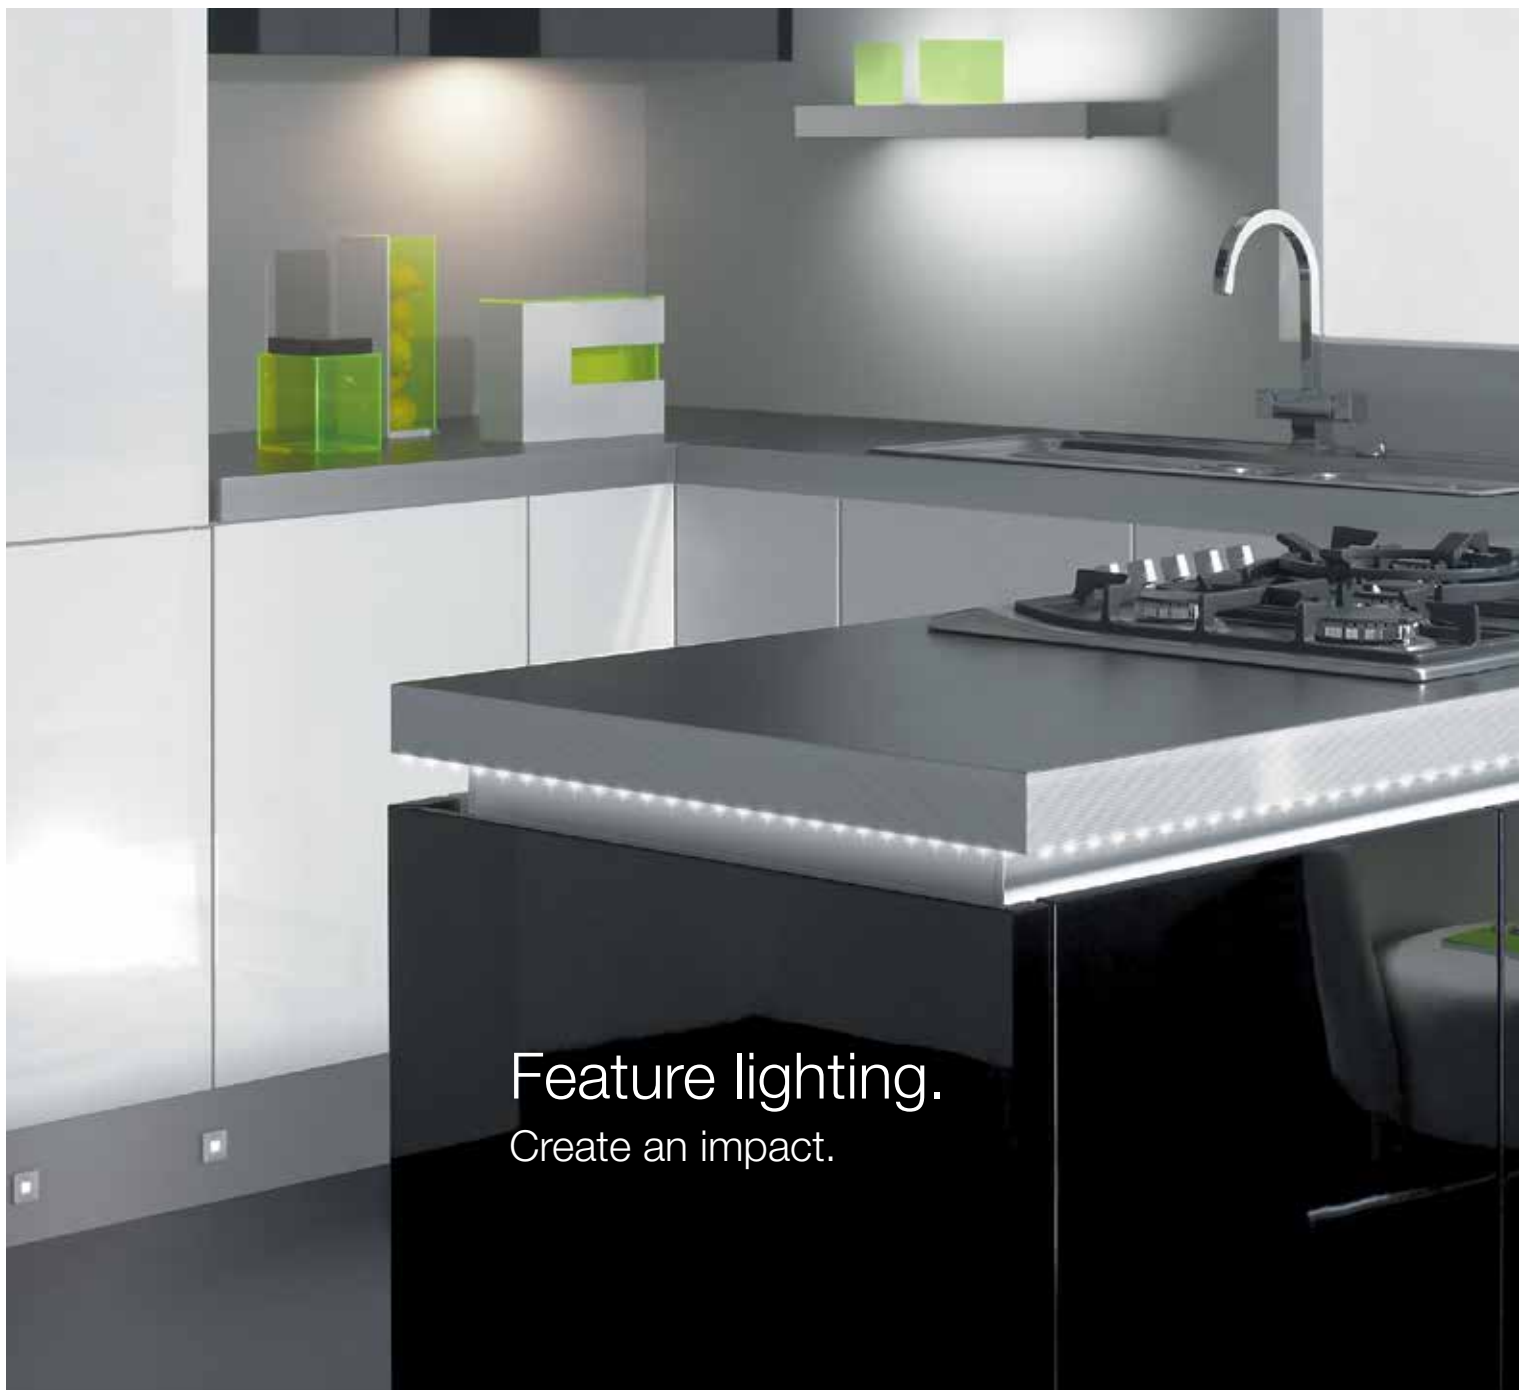

Surface fitted COB cabinet lighting in **Cool White**. (also available as recessed)

Surface fitted COB cabinet lighting in **Neutral White**. (also available as recessed)

Surface fitted & recessed COB cabinet lighting in **Warm White**.

Feature lighting.
Create an impact.

Create a relaxing atmosphere with bespoke LED strip around the island.

Create an impact with an illuminated glass light box.

Add a soft ambience to your kitchen with plinth lighting.

Feature lighting can draw attention to specific objects, features or shapes in a room. Careful placement of light can accentuate any object.

Using our versatile bespoke self-adhesive tape can make a feature of island units. Used around the plinth line or on the underside of the work surface, it can give the illusion of the furniture floating. This can be used to mirror the effect on the rest of the kitchen furniture as well as on top of the cabinets as an effective wall washer.

The colour changing tape can be used in the same way with the ability to pre-set an endless array of colours with the remote. This can result in a stunning effect behind frosted glass doors.

Bespoke self-adhesive flexible LED strip (blue)

Bespoke self-adhesive flexible LED strip (green)

BLANCO Feature lighting

LED square plinth lights

LED round plinth lights

Micro disk LED plinth lights

High definition LED spot round light

LED shelf clip light

Glass light box

LED self adhesive 'Bespoke' tape

Ultra high output linkable LED strip lights

Ultra slimline under cabinet LED strip light

Drawer light

Add ambience with the simple clip on shelf light.

The infra-red sensor switch can be used under cabinets or inside them to act as a sensor for internal lights.

A pull up socket solution is perfect for use with kitchen islands.

Finishing touches.

Add those little extras for maximum impact.

BLANCO offer a number of extras that can add those finishing touches to make all the difference. Remote dimming and switching, ideal for controlling different lighting zones within the kitchen, for example dimming your task lighting to create some ambience whilst eating and entertaining. Clever sensor switches that allow you to activate the lights with a swipe of the hand. Illuminated light shelves and light boxes can be added for extra feature lighting along with clip-on shelf lights that shine through the glass.

Finally our pop-up sockets are a neat solution to putting power sockets onto an island unit. The clever design incorporates 3 UK sockets and 2 USB charging points and neatly slots away when not in use.

Control your bespoke LED lighting strip with a single remote. It has on/off, high, low and medium presets. Plus a touch wheel dimmer control to make setting the mood quick and easy.

LED remote control dimmer

BLANCO Finishing touches

NEW

LED dimming receivers and remote

LED self adhesive 'Bespoke' service
