# THE CHOICE IS YOURS

# THINK ABOUT SINKS

People use sinks in many different ways. Do you require a drainer? How many bowls do you need and what sizes will be most useful? How about the space you have available?

Now turn your attention to style. What will go best with your kitchen? Finally, you need to choose the finish — traditional ceramic, contemporary stainless steel or practical granite?

# TIME TO TALK TAPS

With Caple, a tap is not just a tap. You need to choose the type of lever, whether you want purified water or a pull-out spray head? Or perhaps a 3in1 tap with steaming hot water when ever you need it? And, what do you want your tap to look like? The section on tap types and styles on pages 98-99 will help you. From the visually striking to the practical and easy to use, there's a tap for everyone.

Caple products are manufactured to the highest standards, all of our sinks are tested to BS EN 13310:2015 and CE certified.

# **UNDERMOUNTED SINKS**

Mounted beneath the worktop, which is cut to fit the size of the bowl. A distinctive, fully integrated look in ceramic, granite and stainless steel. Taps are can be mounted into the worktop behind the sink. Granite, solid surface or wooden worktops are compatible with undermounted sinks.

# INSET SINKS

The feature lip around the sink's edge fits on top of the worktop. With finishes available in ceramic, granite and stainless steel. Taps are fitted to the sink itself, however, individual bowls may require the tap to be mounted into the worktop. Granite, solid surface, wooden or laminate worktops can be used with inset sinks.

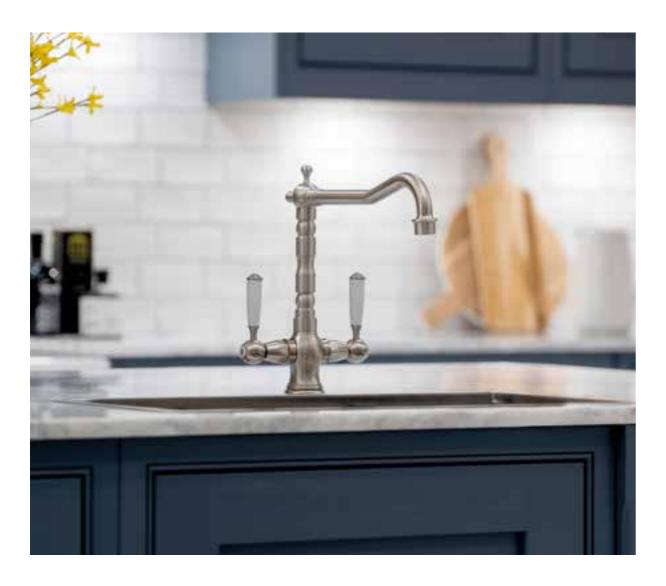

# **FARMHOUSE SINKS**

They can be installed under the worktop with the front face visible - to accommodate the depth, you'll need a short height cabinet. A period Victorian design - traditionally ceramic but now also available in granite. Usually mounted into the worktop, although some sink models allow for them to be fitted to the sink. Granite, solid surface or wooden.

# 0

# Traditional Tastes

Often the heart of the home, the traditional kitchen is warm and inviting. With elegant detailing and subtle design elements it has a comforting, old world charm.

# AN ABSOLUTE CLASSIC

If your kitchen is traditional or country style, you can't go wrong with a classic ceramic. You can choose from the ever-popular and practical farmhouse style for more subtle and sophisticated designs in many shapes and sizes.

# SUITABLY SIZED

They don't come more traditional than the generously proportioned sit-on sinks. Or a smooth and sophisticated inset design might be more to your taste. Whichever you choose, ceramic sinks are hard-wearing and easy to maintain with their smooth, gleaming white glaze.

# **ESPECIALLY FOR YOU**

Caple ceramic sinks are manufactured using time-aged methods and materials, making every one unique.

# **MODERN TWIST**

Although ceramic sinks are notably traditional in appearance they are also beautifully adaptable. Why not pair a single bowl Belfast with a contemporary single lever tap to give a fresh take on a classic look.

# 0

# Modern & Minimal

The last thing you want from the kitchen you choose today is for it to go out of fashion tomorrow. But smartly designed contemporary styling retains its freshness through clean lines, bold colour and striking aesthetics. Where do you start when choosing a contemporary sink and tap?

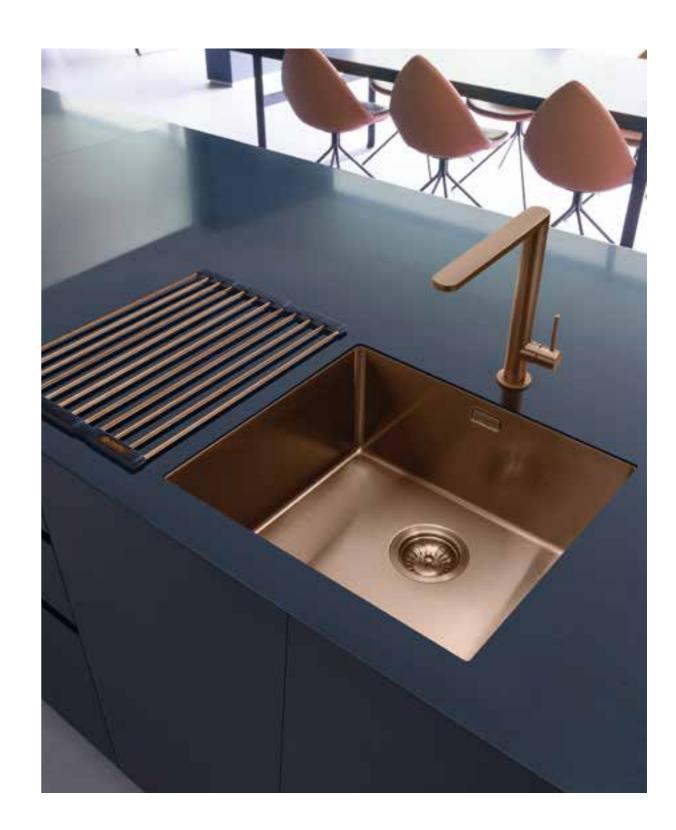

# PROFESSIONAL PULL-OUTS

Try an industrial look with a pull-out or choose a slim line tap for that fresh, contemporary feel. Modern styling is all about contrasts so you can mix and match to your heart's content.

# PICK AND MIX

In the spirit of modernity, why not combine different shapes and sizes? Mix bowls together to reflect your individuality and add the ultimate designer tap for a real talking point.

# NATURALLY GOOD LOOKING

The practical granite sink has become a style icon.

Quite right too, as it offers you immense durability,
and comes in an array of glamorous colours.

# SLEEK STAINLESS STEEL

Quickly being fashioned into ever more inspired and imaginative designs. Its sleek lines complement many colour schemes and appliances.

# Ceramic Sinks

At home in any kitchen, a ceramic sink offers you the simple elegance of a bygone era, yet can look the part in the most contemporary settings.

CERAMIC

# SITTING PRETTY

The Lingfield [above] gives you the option to have a farmhouse style sink which works perfectly with laminate and solid wood worktops. This clever design gives a traditional Butler appearance from the front and protects the cut edges of the work surface from water by using a lip on the sides and rear. It is also simple to install as no bespoke cabinetry is required.

A selection of our handmade ceramic sinks are specially glazed to reduce surface bacteria by 99.99% preventing germs from spreading. Unlike a thin coating, the anti-bacterial glaze will last the lifetime of the sink and is safe to use in every environment.

# ACCESSORIZE

Ceramic by nature is hard-wearing but to avoid any accidents protect the base of the bowl with a perfectly fitting sink gird.

Note: Each sink is hand finished, so no two sinks are ever alike - sizes may vary by plus-or-minus 2%. We recommend measuring the actual sink before fitting.

# Undermounted & Inset Sinks

Choose from inset or undermounted ceramic sinks to make a distinctive style statement. A classic yet contemporary look that exudes elegance and fits easily into many different styles of kitchen.

# **DESIGNER DRAINING**

The design of the drainer pattern can have a dramatic impact on the overall look of the sink. For a flat, modern style, go for our Avalon sinks. If you want something softer, how about the Foxboro range?

# **KEEP ON TOP OF IT**

With their gently raised lip and smooth lines, inset sinks blend subtly and discreetly onto your worktop surface. Available in many shapes and sizes, this versatile style drops seamlessly into any kitchen.

# **UNDERSTATED STYLE**

Fully integrated beneath the worktop, undermounted sinks give a very distinctive look to your kitchen. Used with granite, solid surface or wood worktops.

A selection of our handmade ceramic sinks are specially glazed to reduce surface bacteria by 99.99% preventing germs from spreading.

Unlike a thin coating, the anti-bacterial glaze will last the lifetime of the sink and is safe to use in every environment.

Note: Each sink is hand finished, so no two sinks are ever alike — sizes may vary by plus-or-minus 2%.

We recommend measuring the actual sink before fitting.

# Individual Bowls

Round, square, rectangular, there's a shape and size to complement your kitchen perfectly. Or pair two bowls of your choice for a unique style.

Our elegantly proportioned individual ceramic bowls are more than just practical and hardwearing. They give you complete design flexibility, so you can choose the size, shape and number of bowls to suit your lifestyle.

For a clean and classic look, try our traditional round bowl. For something chic and contemporary, how about a single ceramic bowl paired with a gold tap with matching overflow?

# SINKS

# Granite Sinks

These are practical and beautiful sinks to cope with the demands of everyday living. Granite is synonymous with durability and can also offer you an array of stylish colours to match your décor.

# MATERIAL INNOVATION

# PICK A COLOUR

Our range consisting of families are made from Geotech, which is available in six sophisticated colourways – metallic Anthracite, matt Desert Sand, matt Chalk White, matt Pebble Grey, metallic Black and matt Grey.

Our stunning Black and Anthracite finishes are infused with a sparkling metallic fleck, guaranteed to add a touch of glamour to your kitchen.

Desert Sand has a warm, natural feel if you're looking for understated elegance and Chalk White's rich white tones provide the ultimate in relaxed sophistication. If you prefer a slightly industrial, yet ultra modern tone, Grey or Pebble Grey is perfect to create this look.

# **NATURALLY GOOD LOOKING**

These sinks offer the beauty of natural stone, yet can be moulded into an unlimited number of inspiring designs.

# Features

# KIND ON THE ENVIORNMENT

Geotech is made up of around 80% natural materials and manufactured using low energy consumption.

# **KEEPS ITS COLOUR**

Completely colourfast, the metallic and matt colour finishes will both stay fresh and vibrant.

# **EASY TO CLEAN**

All you need to keep Geotech sparkling is warm water and washing-up liquid.

# **HEAT & BURN RESISTANT**

Geotech is resistant to heat, cracking, discolouring, blistering and warping.

# HIGHLY DURABLE

Produced to be extremely hard-wearing, it takes the knocks and scrapes of daily life in its stride.

# STAIN RESISTANT

Geotech is resistant to permanent staining. As long as it's cleaned regularly, it won't discolour or stain.

# **CUT-RESISTANT**

Both cut and scratch resistant,
Geotech will retain its
unblemished surface through
thick and thin.

With strong, straight lines the Sotera brings a bold presence to any kitchen. A simple, yet refined drainer pattern and the subtle introduction of stainless steel detail within the

bowls and drainer, enhance Sotera's undoubted feeling of quality. Available in all four Geotech colours, Anthracite, Desert sand, Chalk white and Pebble grey, the choice is yours.

# Canis Inset Sinks

Why choose just a sink when you can have a kitchen work centre? Canis is a beautifully practical idea, combining advanced material technology with precision design and aesthetics.

Elegant and architectural, Canis will look magnificent in your modern kitchen. And because it's manufactured using Geotech, Canis will retain its

exceptional looks however rough you treat it. It won't warp, cut or fade, so you can carry out your daily tasks without worrying.

These bowls can be inset for a statement feature or discreetly undermounted offering a truly contemporary look. Practical, versatile and stylish they look great with any worktop.

With their gracefully subtle corners and the satisfying proportions Leesti exudes elegance. Choose from a single or a bowl and a half sink, inset or

undermounted, to give you exactly what you want. For a sophisticated style, why not try two single bowls side by side?

# Stainless Steel Sinks

Stainless steel has been the automatic choice for professional cooks over many years. Why not make it yours? It is tough, resilient and highly practical — and in our range of styles and shapes it looks sensational too.

Universal wooden

chopping board

ACCESSORY

OPTIONS

# Inset & Sit-on Sinks

# PERFECT FIT

Inset sinks are the only sink that can be neatly fitted into any surface type.

# **FAMILY BUSINESS**

Sinks are grouped into families, making it easy to find the style and bowl combination to suit. Each set feature drainers, with a distinctive pattern for a unique look.

# TO THE LEFT?

Do you need a drainer on the left or right side? With many of these sinks you have the flexibility to choose. For a conventional look, go with a single bowl with drainer. Or for something a little different, try a one and a half bowl.

# LOW PROFILE

Low profile for a cleaner, sleeker fitting, our Blaze and Cubit sinks feature a low profile edge of only 1mm.

# CUBIT INSET SINKS

Cubit sinks add minimalist design to the benefits of stainless steel sinks, to create a sink for those that love clean lines and no nonsense modern styling.

Sharp, crisp edges and an uncluttered design, coupled with a sleek, low profile edge of only 1mm, give the Cubit sinks an industrial quality that many modern designers like to use in today's cutting edge kitchens.

# VERTICE INSET SINKS

The Vertice range exemplifies the classic modern sink - it's stainless steel design is a popular choice that looks great in every style of kitchen.

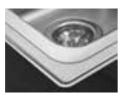

The sink of choice for the professional chef, it's practical and durable [and pleasingly shiny].

Think about how you'll be using your sink, then choose the model that suits your lifestyle.

# Features

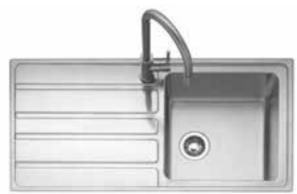

# LOW PROFILE EDGE

With truly exquisite craftsmanship and a sleek low profile cut-edge detail, Vertice looks beautifully chic set into any worktop.

# Zero Individual & Multiple Bowls

For the razor-sharp, minimalist look adopted by designer kitchen aficionados, nothing is better than Zero. These bowls feature crisp edges and clean lines in an uncluttered design.

## LOOKING SHARP

The clean lines and minimalist styling of our Zero sinks suit modern kitchens to a tee. Featuring a unique angular bowl with a zero degree radius and tapered base, they'll take your designer kitchen to a new level.

## PERFECT FIT

The striking geometric bowls come in many sizes and can be inset or undermounted for countless creative possibilities. With multiple bowls and a sleek shallow drainer also available you can let your imagination run riot. Made from stainless steel, they won't rust, stain, fade or crack, remaining pristine whatever you put them through.

# Mode Individual & Multiple bowls

Chic, modern and sophisticated sums up our Mode collection. These smart stainless steel bowls provide a wide variety of options that will finish off your modern kitchen - beautifully.

With so many options to choose from, including single and double bowls and a matching drainer, you'll find just the right combination for your kitchen. To achieve a contemporary aesthetic pair two bowls of your choice.

## **MODERN MODE**

Mode's distinctive look combines ultra modern straight edges and subtly curved corners. The result? A contemporary sink with a touch of class.

## TRULY VERSATILE

Whether you prefer an inset or undermounted look, Mode sinks are flexible enough to accommodate any worktop and tap of your choice.

# FORM INDIVIDUAL & Multiple Bowls

With it's rounded design the Form collection combines the advantages of stainless steel with traditional styling.

The charming, individual bowls come in a selection of shapes and sizes. Or if you want a more personalised combination of sinks you can choose from our multiple bowl options.

You have the choice of an undermounted sink for use with wooden, granite or solid surface worktops, or one of our inset models that can be used with laminate surfaces.

Crafted from stainless steel, Form sinks will keep their good looks whatever you throw at them. Practical, stylish and functional, this collection meets the most demanding kitchen criteria.

## **OPTIONS TO SUIT YOU**

Do you like the clean look of individual bowls but also need a drainer? Our round inset drainer option could be the answer.

For a modern twist on the traditional country cottage style, pair this drainer with a single round bowl dropped into a solid wood worktop.

# WHAT'S YOUR TYPE?

## **VAPOS 3IN1 STEAMING WATER TAP**

Whether you want to make a hot beverage, blanch vegetables or reduce boiling time for pasta, Vapos 3in1 taps have an instant supply of 98°C steaming water. As well as a supply of fresh cold water and regular hot water. And, the incredibly advanced filtration system means it provides the best water quality possible.

SINGLE CONTROL

Simplicity itself, with everything controlled by a single lever
- move it left and right for temperature, or up and down for pressure.

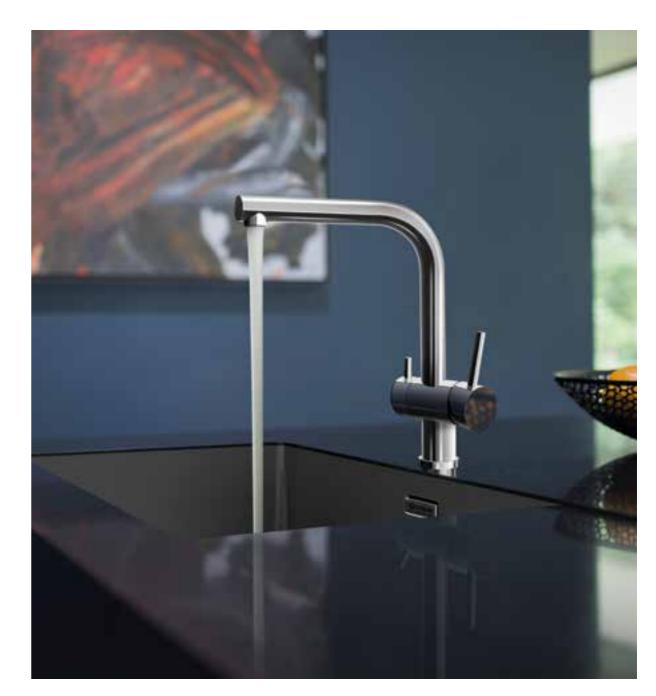

**PULL-OUT SPRAY** 

The only tap for professionals, our stylish range is brilliantly designed, with some models providing a minimum pressure rate of 0.3 bar.

**DUAL CONTROL** 

Added control and ease of use, with a dedicated lever controlling both hot and cold water.

## **CAPLE PURITI**

With a Caple Puriti filter tap you can have ordinary hot and cold water, as well as purified water from one single fitting — as an extra lever diverts water through the filter. The activated carbon filter removes chlorine, rust and sediment so you can feel better about the water you consume. You might also find it improves the taste! Each filter lasts approximately six months and can easily be changed without tools.

To order your replacement filters go to www.caple.co.uk for next day delivery.

TAPS

98

99

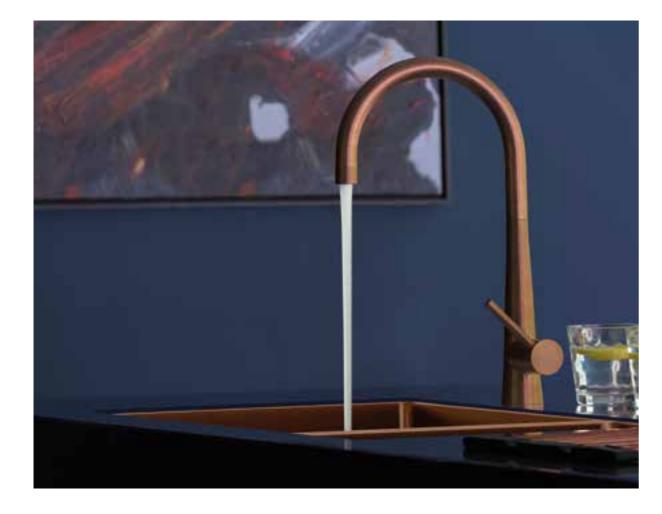

# \_

100

# THE INSIDE STORY

Taps aren't as simple as they look. How they work can be quite technical.

Before you make your choice here are some things to consider.

## SINGLE FLOW

In a single flow tap, there is one channel for hot and cold water to get the correct temperature required.

## **DUAL FLOW**

Added control and ease of use, with a dedicated lever controlling both hot and cold water.

## **WRAS APPROVED**

The Water Regulations Advisory Scheme (WRAS) is the UK
Water Industry's approval scheme.

Our range of WRAS approved taps have been fully tested and are fully compliant with the requirements of the water regulations and byelaws. WRAS Approval is considered the best way to demonstrate compliance as it is granted directly by representatives of the water suppliers and is therefore accepted by every water supplier in the UK.

## **VALVE TYPES**

You can choose from many different valve options to control how your tap works. In a single lever model, the lever is moved in two directions to control the tap. Other types of tap use either basic compression valves or the superior quarter turn valves that respond quicker.

## WATER PRESSURE

Some taps need more pressure than others to flow at the same rate. A pressurised water heater system will provide enough water pressure for any of our taps. However, an unpressurised system may not. You will need to calculate the pressure before choosing a tap that has a minimum requirement — otherwise it might not work properly. To do this, measure how far the water tank is above the tap in metres and divide by 10. This gives the water pressure in bars. Remember that any bends or junctions in the pipework will reduce the pressure.

If you are not sure how to calculate your hot water pressure, ask your plumber. Water pressure can be increased by adding a separate water pump.

# WATER EFFICIENT CSH COMPLIANT TAPS

We have developed a collection of taps specifically designed to conform with the water flow required for the Code for Sustainable Homes [CSH] Level 3. These taps have a flow rate of 4 litres per minute or less when measured at 3 bar of pressure. Look out for the water efficiency logo.

# STAINLESS STEEL

At Caple we don't believe in compromise. Our taps are made from the highest grade stainless steel, giving our stainless steel taps great resistance to corrosion.

Stainless steel is much more than a different look and finish. Unlike chrome taps, stainless steel taps do not have a coating, they are solid steel. Also known as Inox steel, it is an alloy with a 10%+ chromium content and this is what makes it so resistant. The chromium content forms a passive film of chromium oxide on the metal surface protecting the tap.

But our taps are not only tough and well engineered but beautifully styled.

Styles from the more classic to the absolute contemporary and with 23 in the range to choose from you are spoilt for choice. Of course, the stainless steel tap range particularly complements our range of stainless steel sinks. Bring them together and they add a great finishing touch to any kitchen.

TAPS

# TAPS

# Vapos 3ini Steaming Water Tap

Vapos taps supply fresh cold water, regular hot water and filtered 98°C steaming water, the perfect temperature for preparing tea, blanching vegetables and assisting the cooking of pasta or rice.

Water conditioning technology provides exceptional accuracy for scale and acidity control for increased boiler protection, this means outstanding food and beverage quality.

Quick and simple installation allows the tap, filter and boiler to be easily retrofitted. Finished in stunning stainless steel, Vapos taps exude style and practicality.

## **OUTSTANDING WATER FILTRATION**

Offering a new standard of water filtration technology, providing extraordinary accuracy for scale and PH control. This water filtration and conditioning technology effectively combines hardness reduction, mineral stabilization and corrosion inhibition by maintaining a controlled low carbonic acid level in the water.

It delivers the best available water quality for hot drinks by removing lime scale build up in the boiler [provided filters are installed and maintained/exchanged in line with manufacturer recommendations].

It includes DuoBlend® valve technology for the most accurate bypass ratio and a 5µm Carbon block membrane for particle protection, reducing tastes and odours such as chlorine and chlorine by-products, THM's, PAH's and pesticides such as Simazine, Atrazine, Lindane and Dieldrin. Each filter lasts approximately six months and is easily changed without tools.

Order your replacement filter cartridge [PURITI3] or full fitting kit including the cartridge [PURITI4] at www.caple.co.uk for next day delivery.

Boiler dimensions: width 190mm, height 290mm, depth 225mm

## LARGE BOILER

A large boiler capacity means 2.4 litres of steaming water is ready for use whenever you need it. With a temperature range of 50°C - 98°C it uses less electricity than a 40W light bulb.

All caple accessories are available to buy online at www.caple.co.uk

- Supplies fresh cold water, regular hot water and filtered 98°C steaming water
- Water conditioning technology providing exceptional accuracy for scale and acidity control for increased boiler protection, plus increased food and beverage quality.
- 2.4Ltr tank, up to 100 cups per hour
- Temperature range of boiler 50°C to 98°C

## TAP FEATURES

- Minimum 0.5 bar pressure required
- Safety mechanism for steaming water control
- Cool touch spout
- Separate flow for steaming water

## OPTIONAL EXTRAS

- PURITI3 Replacement filter Available to buy online www.caple.co.uk

## Features

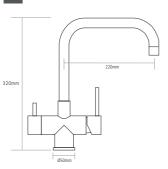

advanced filtration system all the water's impurities are reduced, even in hard water you get the best quality tea every time.

## PERFECT CUP OF TEA

Due to the technologically areas. Fantastic filtration means

## DIMENSIONS

Worktop cut out 35mm required

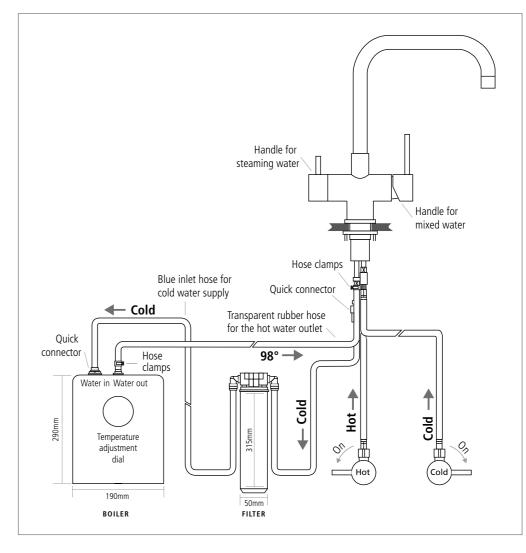

# So, Here's The TECHNICAL BIT...

The cold water from your water supply passes through the filter into the 2.4L boiler. The water temperature can be easily adjusted from 50°C - 98°C to suit your requirements by simply turning the dial located at the front of the boiler.

For steaming water use the smaller lever on the left hand side of the tap. Push down the lever to release the child safety mechanism then turn and hold to start a

steady flow of steaming water, when you are finished the unique spring loaded lever automatically shuts off the steaming water.

It couldn't be easier to change the filter. There is no need to cut off the water supply, just twist the used filter to release it - this automatically isolates the water supply making it easy to twist the new cartridge into place.

All Caple accessories, including replacement filters and fixing kits, are available to buy at www.caple.co.uk for next day delivery.

# PUR<sub>I</sub>TÎ

Fancy purified, filtered cold water on tap?

Puriti

Choose a Caple Puriti tap to deliver regular hot and cold water with the added benefit of fresh filtered water. It is either dispensed using a third lever or sometimes fully integrated into the standard design.

An ingenious filtration system is hidden from sight in the kitchen unit, and by turning the filtration tap, your normal cold water supply is diverted via the Caple filter to the tap and in to your glass. It is also great for areas with particularly hard water.

By using the filtered water in kettles and cooking you greatly reduce the damaging impact of lime-scale build up in appliances and reduce the effect of water impurities during food preparation, whilst also improving tea and coffee.

As the filter tap is turned the normal cold water supply is redirected through a series of filtration processes including activated carbon. This removes almost all chlorine improving the taste, and other impurities such as particulates, bacteria, rust, heavy metals and pesticides, while also acting as a scale inhibitor. It also helps maintain the pH balance of the water, which is much healthier than consuming overly acidic or alkaline normal tap water.

Caple Puriti filter can last up to 4 x longer compared to other filtration systems on the market. Puriti filters up to 6000 litres compared to only 300 - 1500 litres.

The Caple Puriti filter is discreetly installed under the sink. It will be easily accessible for changing which will need to be done about every six months. This is a very straight-forward process that does not require any tools.

## Features

## HOW TO REPLACE YOUR FILTER

Replacing your filter is simple and straightforward. Watch our step by step video on our YouTube channel, CapleTV.

# Pull-Out & Spray

More and more of us no longer see our kitchens as a place where we merely make something to eat but a place to experiment with new tastes and new techniques. A place to enjoy the preparation and creation of food for family and friends.

We are spending more and more time in our kitchens. Never has it been more true that they are the heart of the home.

Therefore, the demands and expectations from our kitchens, the appliances and the fittings also become more demanding. This is where Caple's range of spray taps step up to the plate.

With technology taken from professional kitchens they work on the same principle as a single lever tap design with the standard hot and cold functions.

However on some models the nozzle pulls out on an extended, flexible metal hose. By pressing the button on the side of the spray head the nozzle produces a high pressured spray or jet of water.

## **PULL-OUT SPRAY TAPS**

The powerful spray makes it so much easier to wash and rinse items. Used in most professional kitchens worldwide, it's a must-have for accomplished chefs.

The secret is in the nozzle. As well as a powerful spray, some models have a long flexible hose that can be pulled out allowing you to move the tap freely around the sink.

# SINGLE CONTROL

## **ENDLESS CHOICE**

With Caple's single control taps you can be sure that the engineering that goes in to one of our taps is second to none. Smooth gliding operation, robust seals and a solid finish. So now all you have to do is decide which style and finish is best for you. With various finishes in so many designs from the classic to the contemporary, it maybe harder task than you think.

## SINGLE LEVER SIMPLICITY

Everything controlled by a single lever – move it left and right for temperature, or up and down for pressure.

## **EASY AND ADAPTABLE**

Single control or single lever taps have stood the test of time. It is testimony to their ease of use and adaptability to great design.

SINGLE CONTROL

# Dual Control

## CLASSIC, COOL AND CONTEMPORARY

Classic does not mean old fashioned. For many of us dual control taps are a matter of personal preference. Hot on the left, cold on the right. It's as simple as that.

> But even with the classic dual control, designs vary. There is the monobloc design or bridge design.

Choose ceramic handles to match your ceramic sink. Sleek solid stainless steel — a premium material and very contemporary. Chrome - bright and reflective. Brushed nickel – subtle and blemish free. Pewter. Distinctive with a traditional twist.

All meticulously designed and beautifully engineered.

Whichever you choose you can be sure that they all have one thing in common Caple's uncompromising quality.

# Waste Disposal Units

A waste disposer hidden away under the sink can help you recycle your food scraps and leftovers like potato peelings, chicken bones, egg shells and tea bags. It's clean, it's green and it leaves you less to clutter up your bin.

Simply turn on the cold tap and the disposer, then empty everything into the sink. The disposer grinds the food waste into fine particles and flushes the waste away down the drain.

Since more than 25% of household refuse is food, that means less rubbish for the dustmen to take away to clog up our landfill sites, and a reduction in the amount of greenhouse gases emitted.

Disposer waste can be recycled into a soil conditioner once it reaches the water treatment plant so you will be making a positive contribution to your environment.

WASTE DISPOSAL UNITS

151

## 1.0HP WASTE **DISPOSAL UNIT**

## PRODUCT CODE WDU100

## DIMENSIONS

Width 216mm Depth 216mm Height 437mm

**GENERAL FEATURES** 

- 3 YEAR GUARANTEE
- 1.0hp waste disposal unit
- Continuous feed
- High speed magnet motor
- Overload protection
- Corrosion resistant 3 stage grinding system
- Easy mount installation
- Sound insulation
- Air switch WDUAIR included
- Removable splash guard
- Fits standard 90mm waste outlets

## ACCESSORY OPTIONS

- Basket strainer waste decorative cover CWC2

## 0.75HP WASTE **DISPOSAL UNIT**

PRODUCT CODE WDU075

## DIMENSIONS

↔ Width 216mm Depth 216mm Height 400mm

## **GENERAL FEATURES**

- 2 YEAR GUARANTEE
- 0.75hp waste disposal unit
- Continuous feed
- High speed magnet motor
- Overload protection
- Corrosion resistant 3 stage grinding system
- Easy mount installation
- Sound insulation
- Air switch WDUAIR included
- Removable splash guard
- Fits standard 90mm waste outlets

## ACCESSORY OPTIONS

- Basket strainer waste decorative cover CWC2

## 0.5HP WASTE **DISPOSAL UNIT**

PRODUCT CODE WDU050

## DIMENSIONS

↔ Width 175mm Depth 175mm Height 372mm

## GENERAL FEATURES

- 2 YEAR GUARANTEE
- 0.5hp waste disposal unit
- Continuous feed
- High speed magnet motor
- Overload protection
- Corrosion resistant 3 stage grinding system
- Easy mount installation
- Sound insulation
- Suitable for air switch WDUAIR
- Removable splash guard
- Fits standard 90mm waste outlets

## **ACCESSORY OPTIONS**

- Basket strainer waste decorative cover CWC2

## 1.25HP WASTE DISPOSAL UNIT

## PRODUCT CODE

WDU125

## DIMENSIONS

↔ Width 220mm Depth 220mm Height 439mm

## **GENERAL FEATURES**

- 3 YEAR GUARANTEE
- 1.25hp waste disposal unit
- Continuous feed
- High speed permanent magnet motor
- Overload protection
- Corrosion resistant 3 stage grinding system
- Bio shield odour protection
- Easy mount installation
- Sound insulation
- Air switch included
- Fits standard 90mm waste outlets
- Fits sinks up to a thickness of 23mm (an extended flange is available for sinks up 45mm thick) EX/WDU125

## ACCESSORY OPTIONS

- Extended flange EX/WDU125
- Basket strainer waste decorative cover CWC2

## Features

## **EASY INSTALLATION**

The lightweight and compact design of the WDU125 features easy mount installation, a system that enables fast easy installation.

## **BIO SHIELD ODOUR PROTECTION**

With Bio Shield odour protection, the WDU125 is treated with Antimicrobial agent to provide ultimate protection against the growth of bacteria and subsequent odours.

Features a 1.25hp motor and grinding system with a superior torque grind speed for along system life and maximum power.

All models carry a lifetime corrosion proof guarantee, this warranty covers against failure due to corrosion.

## WDUAIR

Chrome air switch is an optional extra with the WDU050. It comes as standard with the WDU075 and WDU100, requires a 35mm cut-out.

# GUARANTEES

For peace of mind, we provide the following guarantees on our sinks, taps and waste disposers.

## SINKS

5 year guarantee against manufacturing defects
