De Dietrich

CRÉATEUR D'ÉMOTIONS DEPUIS 1684

DE DIETRICH THE ART OF LIVING

"My profession was ignited from a coal-fire stove 40 years ago, and since then I have put my heart and soul into creating cuisines that are creative, close to perfection and delicious.

When De Dietrich, which shares the same perpetual search of excellence, suggested a collaboration, I accepted with great enthusiasm so that together, we can transmit our shared love and passion for fine cuisines. From simple processes to sophisticated techniques, everything is possible and your creativity knows no bounds; thanks to the ultra efficient and high performing kitchen appliances from De Dietrich.

Love, art and technique come together to make fine cuisines".

Pin Gagnaire

VIRTUOSITY

As defined by La Maison De Dietrich:

“Transforming raw materials to add elegance and emotion using a high level of technical control and the utmost precision. Demonstrating the very essence of our talent, boldness and creativity in constantly reinventing products that have excellence and emotion ingrained in them, as well as being outstanding culinary products.”

De Dietrich

How To Register Your Warranty?

Please register online at www.de-dietrich.ie/warranty-registration

Before registering, please have:

1. Serial number
2. Date of purchase
3. Place of purchase
4. Your full name, address & phone number

Please retain your original proof of purchase to secure your warranty.

Aftersales Service

Please contact us online on www.de-dietrich.ie/contact or call an advisor on 01 4136400.

Before contacting us please have:

1. Serial number
2. The phone number the product was registered against
3. Fault details

THE LEGACY

◇ Family Legacy

- 1684** A rich banker from Alsace, Johann Dietrich, bought a traditional foundry in Strasbourg.
- 1761** Jean De Dietrich, Johann's grandson, was knighted by King Louis XV.
- 1778** Louis XVI granted official recognition of the De Dietrich hunting horn trademark.
- 1792** Rouget de Lisle song "The Marseillaise" at the home of Baron De Dietrich, the first Mayor of Strasbourg.

1778

1792

1850

◇ Industry Legacy

- 1848** Railway construction.
- 1850** First wood and coal cookers.
- 1968** First built-in kitchen.

◇ Brand Legacy

- 1970** First pyrolytic oven.
- 1978** First induction hob.
- 1980** Introduction of the first multifunction oven.
- 1997** First built-in steam oven.
- 2003** ICS/Chef technology. First gas hob with touch controls.
- 2005** Low temperature professional cooking programme.
- 2007** First colour matrices oven.
- 2008** Continuum, first induction hob with a free area of 40x23cm.
- 2010** Piano, first 100% zoneless induction hob.
- 2013** HoriZone, induction hob without any limit.
- 2015** Chef Tactilium induction hob.
- 2016** Full combi steam pyrolysis.
- 2017** Fully automatic Patisserie mode. ICS hob function.
- 2017** Perfect Sensor ovens and probe hobs.

OVEN DX DISPLAYS EXPLAINED

DX0 Display

White LED Programmer.

This provides a crisp display of all the main functions and cooking settings, such as recommendations regarding oven temperature or the length of resting time.

DX1 Display

Gourmet White LED Screen Programmer.

After selecting a preprogrammed function or dish, a clear and crisp on-screen display recommends what shelf to place the dish in the oven and the best temperature to use, and guides you through the programmed cooking process.

DX2 Display

Epicurien Screen Programmer.

Like the Connaisseur Programmer, it uses the same access system where you can navigate through submenus and different types of dishes using the dial provided. Each available function and recipe is depicted on screen using delicate sketches.

DX3 Display

Connaisseur Screen Programmer.

This interface is home to a simple and intuitive high-definition colour screen which lets you navigate through sectors and submenus. Photos are displayed on the screen when exploring the endless preset dishes and recipes.

NEW PERFECT SENSOR OVENS

De Dietrich offers the **Perfect Sensor** collection: This exclusive technology patented by De Dietrich detects the humidity levels of each dish and adapts all cooking parameters automatically in real-time.

The new **Perfect Sensor** has new algorithms to deliver precision cooking. The combination of the new **Perfect Sensor** and Chef Mode lets your inner connoisseur shine through, by creating perfect dishes ever time. It allows you to prepare up to 15 of your most frequently cooked meals automatically. You simply choose the dish on your menu and put it in at the correct shelf level, as recommended by the oven, which adjusts all settings automatically. Simply "Twist, Cick, Cook".

Cook meat to perfection with Chef Mode and the **Perfect Sensor** to your taste

OVEN FUNCTIONS & FEATURES EXPLAINED

Functions

Multifunction Plus:

Combined Heat and Fan Cooking functions, exclusive to De Dietrich.

Among the functions offered by the Multifunction Plus, two cooking modes stand out: Combined Heat and Fan Cooking.

With an element surrounding the fan which ensures a perfectly even distribution of heat, the **Combined Heat** function has been specifically designed for moisture retention cooking methods, as used for tarts, quiches or pizzas. This technique also provides energy savings. The temperature rises very quickly, thus eliminating the pre-heating phase.

The **Fan Cooking** function is the only process that preserves the delicate texture of white meat and the aroma and flavour of foods cooked *en papillote*; this allows different dishes to be cooked on three levels at the same time whilst preserving the individual aromas and tastes of each.

“Variable Grill” Function:

Modulates the heat of the grill between 1 and 4 settings to achieve the perfect desired heat.

French Patisserie Mode:

14 recipes available.

Macarons, cannelés, chocolate fondants... With this function, you can count your De Dietrich oven to help you skilfully and successfully produce these patisserie classics. Choose from the 14 recipes available for automatic cooking.

Low-Temperature Cooking:

10 dishes available.

Used by top chefs, this gentle, even and consistent method of cooking at temperatures lower than 100°C is perfect for delivering particularly tender and flavoursome meat. All you have to do is make your selection and the oven will then automatically cook the dish as required.

The Culinary Guide:

Up to 50 recipes available.

After choosing a preprogrammed recipe and entering the weight of the dish, the oven automatically determines the appropriate cooking mode, as well as the ideal temperature and the cooking time required down to the minute.

Drying Function:

This dehydration process allows you to dry a large number of different foods at a perfectly controlled temperature between 60°C and 80°C, including aromatic herbs, fruits and vegetables. By preventing the build-up of bacteria, it allows you to preserve produce for several months. It also preserves essential elements such as vitamins, minerals and flavours.

Features

73-litre Volume:

De Dietrich ovens stand out due to their large 73-litre cavity capacity. This space makes it easy to prepare large or wide dishes, with six different shelf levels easily identifiable on the sides of the oven so that you can follow its recommendations and place your cooking dish at the ideal height.

A+ Energy:

The carefully thought-out cavity design and the reinforced wall insulation makes for a shorter pre-heating time and perfect temperature control.

Control Lock Safety Feature:

Allows you to lock the control panel to avoid starting the oven accidentally.

Auto-Stop Safety Feature:

Automatically shuts off the oven after 23 hours if someone forgets to turn it off.

Cool Door 4 Glass Panels:

Thanks to a ventilation system that is exclusive to De Dietrich and the use of four glass panels, the oven door never gets hot enough to burn you.

Soft Close Door:

This patented system, exclusive to De Dietrich, enables the oven door to gently close itself.

3 Pyro Cleaning Levels:

With the **Pyro-Turbo** function, the oven is out of action for 2h compared to 1h30 in **Pyro Eco** mode. The **Pyro Express** mode cleans the cavity in 59 minutes flat by using residual heat from a previous cooking process.

Auto-Pyro System:

This feature automatically sets the time required for pyrolysis between 1h30 and 2h15, depending on the level of dirtiness detected. This cleaning process combines efficiency and economy.

Drip Tray & Basting Racks:

A drip tray is included in all ovens. It has a handle at the front for ease of movement. On certain models, the drip tray is equipped with two adjustable and removable half racks, specially designed so that you can baste your dish with the cooking juices. The racks are designed so that they can be brought securely forwards up to three quarters of the way out of the oven. They are fitted with two feet and an arch at the back which prevents dishes from tipping over.

Telescopic Rails:

Depending on the model, the rolling rail system enables you to slide racks and dishes in and out of the oven with the greatest of ease.

Easyclean Inner Walls:

A smooth, highly resistant enamel cavity is exceptionally shiny and durable, as well as being extremely easy to clean.

DOR7586X | PLATINUM

DOR7586A | ABSOLUTE BLACK

DOR7586BB | COAL BLACK

Steam combination cooking. Tasty, healthy and nutritional.

This steam cooking process does not require any special installation to take place, thanks to the water tank located on the front of the appliance.

Two cooking applications are offered within the Combined Steam setting: a three-function **Steam Expert mode** and a **Culinary Guide**.

In Steam Expert mode, one of the three functions must be selected, and the temperature, cooking duration and end of cooking time must be set, as well as the steam percentage. The steam in the oven can be adjusted between 20% and 80%.

With the Culinary Guide "Recipe Mode", all you have to do is choose from 73 different recipes, of which 38 are Combi Steam recipes, and enter the weight of the dish. The oven will then automatically adjust all settings (cooking mode, temperature, steam percentage and cooking time). With the ability to cook, defrost and reheat without drying food out, the De Dietrich Combi Steam oven is the ideal partner for creating tasty and light dishes, full of vitamins and minerals.

DE DIETRICH

HOBS

Perfect Sensor Temperature Probe

EXCEPTIONAL MODULARITY FOR AN INFINITE CULINARY EXPERIENCE

NEW PERFECT SENSOR HOBS

De Dietrich offers the **Perfect Sensor** collection: new hobs which measure and regulate the cooking temperature for degree precision dishes. Temperature fluctuation has an impact on cooking results. Thanks to its connected probe, the hob indicates in real-time the accurate temperature to the nearest degree measured in your dish. This allows to control the cooking of ingredients and grants the ability to achieve culinary excellence.

The **Perfect Sensor** hob has three modes of cooking:

- ◇ Autonomous control of the cooking temperature with visualisation on the keyboard of the exact temperature inside the pot
- ◇ Set the temperature you wish the dish to reach
- ◇ Management of the temperature using one of the 5 pre-set temperatures available on the direct access key pad - melt, sous vide (vacuum cooking), reheat, simmer and boil

This is ideal for tempering chocolate, cooking the perfect medium rare steak, or just for peace of mind that your chicken cooked all the way through.

INDUCTION HOBS

FEATURES & FUNCTIONS EXPLAINED

Features

HoriZone:

A product of the combined technological expertise held by the French engineers at De Dietrich, this 40cm x 23cm flexible cooking space is the most comprehensive cooking zone on the market. Wide, oval, rectangular... it can accommodate cookware of all shapes and sizes, from 23cm frying pans to 40cm oval casserole dishes.

HoriZone Play:

This innovative design enables you to use a single hob for multiple different cooking methods, giving you unprecedented taste sensations. Delivered with a chopping board

A grill and plancha are available as optional accessories on HoriZone Play hobs. They have a dedicated cooking mode on the keypad, they sit securely on to the hob surface as they attach to a stainless steel profile at the back of the hob.

DA17002S | GRILL
RRP: €249.99

DA17003S | PLANCHA
RRP: €249.99

Functions

ICS:

This recommends the best-suited zone for any given pan so that you get maximum efficiency.

Timer:

Each zone is equipped with its own timer, which you can use to programme the cooking time for between 1 and 99 minutes.

Elapsed Timer:

The time since the last heat adjustment was made is displayed on the keypad. This function is perfect for keeping an eye on dishes, and is essential for when you forget to set the timer.

Recall:

The programmed settings (for heat and time) are saved so that you can retrieve them should the cooking zone turn off unexpectedly.

Switch:

This is a settings tracker that offers you the advantage of being able to move your pan from one zone to another and keep the same settings (cooking style and timer).

Boil:

This feature is ideal for cooking pasta, it allows you to boil a specific amount of water and notifies you when it has boiled. It then automatically sets a timer for 8 minutes (which can be adjusted) to cook your pasta to perfection.

Direct Access Keys

With a simple touch on the dedicated button, De Dietrich induction hobs provide you with instant access to power settings for searing, simmering, or keeping your dishes warm and boost. These programmes are adjustable if you would prefer to change the dedicated power level associated with each key.

◆ **Keep Warm:**

◆ **Simmer:**

◆ **Sear:**

◆ **Boost:**

or pushing the physical limitations of time, with the ability to boil 2 litres of water in record time.

Safety Features

◆ **Clean Lock:** Temporarily blocks all commands for one minute.

◆ **Anti-Overheating:** This limits the temperature on a zone to under 300°C.

◆ **Anti-Overspill:** If liquid spills out onto the control panel, the hob turns itself off automatically.

◆ **Keyboard Lock:** This function prevents anyone from turning the hob on accidentally.

◆ **Residual Heat Indicators:** after a long cooking period, the zone surface may stay hot. The letter "H" displays on the keypad while the temperature remains above 65°C.

◆ **Automatic-Stop:** if it looks like you might have forgotten about a dish you are cooking, the hob will turn itself off.

◆ **Cookware Detection:** Once turned on, the hob will automatically recognise when a pan is placed on any of its zones and displays it on the keypad. If no pans are placed on the hob, LEDs flash until it is started properly, and the system will turn itself off after one minute.

◆ **Small Utensils Safety Feature:** The induction surface is only activated when it comes into contact with metallic surfaces over 10cm in diameter.

◆ **Voltage:** Able to detect low voltages*.

◆ **Connection:** A beep is emitted and electrical circuits are protected in the event of an incorrect connection*.

◆ **Overvoltage:** This valuable safety feature prevents damage to electrical circuits, particularly in the event of lightning*.

*Within limits of tolerances

GAS HOBS

THE LEVEL EXPECTED OF
A TOP QUALITY BRAND

A wide-ranging collection with something for everyone.

There is something to suit everyone's requirements in the most diverse collection designed by De Dietrich to date, with a wide variety of shades and sizes available. Available in 60cm, 75cm and 90cm-wide models, all gas hobs are compatible with each other so that you can create a cooking area that is exactly how you want it.

Guaranteed performance.

The gas burners provided with De Dietrich hobs offer various cooking options and a wide range of heat settings. Leaving pans to simmer on the auxiliary burner or searing meats to perfection on the 3.8kW Triple Crown burner are just two of the many ways that you can use them, with an even distribution of heat consistently ensured throughout the cooking process.

Safety

A thermocouple safety system is located against each burner, which activates as soon as you touch the controller to ignite it. If necessary, this thermocouple instantly and automatically cuts off the gas supply to prevent any leakages occurring should the flame accidentally be extinguished.

Designed

All knobs have been ergonomically designed to offer the highest levels of ease and comfort during use. Adjusting the heat of the burners is an easy and accurate process.

The hob itself fits flush with the work surface and the hob area dips below rather than the conventional design of it protruding upwards, which retains the flow of your worktop.

STAINLESS STEEL GAS HOBS

60CM GAS HOB DPE7620XF

With a prized stainless steel surface that immediately captivates the eye, and crowned with two cast-iron grills, it fits perfectly with our tradition of providing a level of excellence which invites you to continue exploring the art of cooking in the utmost sophistication.

- ◇ Stainless Steel Hob with 4 Gas Burners: Rear Left Semi Rapid 1.75 kW
 - ◇ Total Gas Power of 7,500W

DE DIETRICH

DOMINO HOBS

EXCEPTIONAL
MODULARITY FOR
AN INFINITE CULINARY
EXPERIENCE

The range of domino hobs in the new De Dietrich collection is one of pure excellence, with each offering the utmost in sophistication and technical innovation. Combine them to create a cooking space that is both unique and original.

horiZone, creative innovation from De Dietrich.

This cooking zone, already one of the largest and most powerful around, adds yet another dimension to the outstanding performance that is expected from an induction hob: freedom. This modular space enables you to work with one or two classic cooking zones at the front and back of the domino, as well as an ample single zone perfectly designed to accommodate large pans and dishes, all whilst guaranteeing a perfectly even distribution of heat.

horiZone Play - exceptional flexibility

Accompanied by a chopping board made with wood from the Sologne region of France, removable grill and plancha accessories are also available for this domino which are perfectly designed to fit seamlessly onto the horiZone zone. A feature for linking cooking appliances, which can then be accessed directly via the programming control panel, allows you space to get creative and let your culinary talents run free.

Gas domino hobs

Gleaming glass surfaces that are crowned with single-burner cast-iron grills.

DOMINO HOBS

30CM INDUCTION DOMINO HOB DPI7360X

The domino hob can be used with a combination of other hobs or left to stand alone. The two zones are supported by some of the top cooking, programming and safety features around.

HOODS

HOODS THAT ARE HIGHER PERFORMING, MORE INTUITIVE AND QUIETER THAN EVER

Power efficiency:

Nowadays the kitchen is less removed than ever before, with walls being taken down to create open living spaces with dining rooms, living rooms and lounges. With the development of power settings that reach up to 800m³/h, the extraction range brought to you by De Dietrich has become part of this transformation, providing effective and regular air renewal in even the largest of spaces.

ICS

ICS uses sensors to detect heat and vapour, and turns on automatically as soon as it does. It intelligently adapts its speed of extraction, and turns itself off ten minutes after it detects that the last of the vapours have been extracted.

Boost function.

When selected, this feature immediately sets the hood to work at maximum extraction speed for even greater efficiency when large amounts of vapour or cooking aromas are present.

Eolyse® function.

For use at any time - even when you're not in the kitchen. By activating this function with a simple tap on the touch-sensitive button, Eolyse® silently filters and renews kitchen air in a one-hour process. You can also programme this function to take anywhere between two and nine hours. Depending on your instructions it can - for example - turn itself off at the end of the evening.

Delayed Stop function.

This system has been designed to totally eradicate any residual post-cooking vapours. The hood continues to function for ten minutes after the last speed is selected, then turns itself off automatically. The delayed stop function is automatically activated on hoods equipped with ICS technology.

Auto-Stop safety feature.

This precautionary system automatically switches off the extraction or lighting features on the hood after operating for nine hours with no intervention from you.

Saturation indicator for grease and carbon filters.

In order to ensure the hood works at maximum efficiency, we recommend that grease filters are cleaned and the carbon filter is changed regularly. This warning light illuminates when grease has built up on the filters and they need cleaning or replacing.

DE DIETRICH

DOWNDRAFT HOODS

DHD7261B | ABSOLUTE BLACK

120CM DOWNDRAFT HOOD DHD7261B

Compatible with all hobs in the Collection, its motor is hidden away under the counter during installation to leave nothing but an understated black glass surface on show, combining an unobtrusive appearance with low noise levels.
